

envirosafe™

ABOVE-GROUND FUEL SYSTEMS

Shown above: 12,000 gallon Envirosafe Fireguard tank for generator application at VA Hospital located in Tampa, Florida.

FIREGUARD® Features:

- Insulates product in tank from ambient temperature variations, reducing emissions to the environment
- Primary and secondary tanks are tightness tested on site with standard testing procedures
- Steel outer wall provides low cost maintenance and protection from weathering
- Primary storage tank and secondary containment are compatible with a wide range of fuels and chemicals
- Support designs available for all seismic requirements
- Interstitial space can be monitored for leak detection
- Meets temperature requirements when the furnace test was extended to 4 hours

Additional Features:

- Steel construction allows for recycling
- Low cost compartments and customization
- Built to nationally recognized STI standards with strict third-party quality control inspection program
- Supports designs with engineered hurricane tie-downs

FIREGUARD® is the only tank that meets all of these standards:

- UL 2085 Listed "Protected" tank
- Ballistics and impact protection per UL 2085
- Both the inner and outer steel tanks are built to UL Standards
- National Fire Protection Association (NFPA) 30 & 30A
- International Fire Code (IFC)
- California Air Resources Board (CARB) Standing Loss Control testing requirements for air emissions
- Steel Tank Institute (STI) Standard F941 for Thermally Insulated Aboveground Storage Tanks

Unique Thermal Insulating Material is 75% Lighter than Concrete

Compatible With a Wide Range of Fuels and Chemicals Including Biodiesel and Ethanol

Available Designs:

- Horizontal
- Vertical
- Rectangular

FIREGUARD® double wall fire protected aboveground storage tank features an inner and outer steel tank with a unique lightweight thermal insulation material that exceeds the UL 2-hour fire test. Insulating material is 75% lighter than concrete reducing shipping, installation, and relocation costs.
